AVAILABLE IN 2KG BUCKETS

USAGE:

Backwash filter monthly before adding blue powder.

Week one: - Add one Blue and one White packet to the weir, while filter is running.

Week two: - Add one white packet

Week three: - Add one white packet

Week four: - Add one white packet

Repeat every four weeks with a new pack.

Above quantities apply to small and medium sized pools, up to 50 000 Litres, for larger swimming pool use double the quantity.

Helpful Hints

Keep pH of pool water between 7.2 and 7.4 for best results.

Back wash weekly to expel dirt.
